IODOCAL+

Calcium Hydroxide Barium Sulphate Paste

TECHNICAL & SAFETY INSTRUCTIONS FOR USE

Product Description: This is premixed oil based calcium hydroxide paste containing calcium hydroxide & Barium Sulphate and used for lining and capping.

Application: Used for pulp capping and pulpotomy. Apexifications and hard tissue formation. Treats infected root canals, abscesses and pre apical lesions. Treats traumatic injuries, root resorption, fractures and perforations and also treats pus, hemorrhage and weeping canals.

Composition: Calcium Hydroxide, Barium Sulphate and Excipients.

Methods of use: After root canal preparation, clean and dry root canal. Attach pre bent plastic disposable needle to the syringe and check the flow of paste through the needle. Insert needle into the canal, about 2mm short of the apex. Fill canal completely by pushing the plunger while slowly withdrawing the syringe. Clean excess paste with a sterile cotton pellet.

Warning: Avoid prolonged or repeated contact with skin (allergic contact dermatitis) and eyes. Avoid prolonged inhalation. Do not take it internally. Contact with the skin may cause irritation, burns of hypersensitivity. If contact with skin occurs immediately wipe off thoroughly with cotton and alcohol and then wash well with soap and water. If skin rash and sensitization or other allergic reaction occurs discontinue use and seek medical attention. If the product comes into contact with the eyes, rinse thoroughly with fresh water and consult a physician. It should not be used with patients who have a history of severe allergic reaction to any of the components.

Storage: Store at room temperature between 10~ 35 ^{0}C. Protect from direct sunlight. Close the container carefully after use. Keep away from moisture. Shelf life not affected after opening if stored in cool & dry place

Disposable conditions: To be disposed off based on the prevailing rules of the country in which it is used.
