KRIS ROCK

2 Chromatic Layers

TECHNICAL & SAFETY INSTRUCTIONS FOR USE

INTENDED USE: Based on PMMA co polymer, used for fabrication of artificial dentures.
Composition: Co polymer of Polymethyl methacrylate, Plasticizer, etc.
Areas of Application: For fabrication of artificial full & partial dentures .
Procedure to use Material: The process of fabricating a denture usually begins with a impression of the maxilla or mandible. This impression is used to create a stone model that represents the arch. A wax rim is fabricated to assist the dentist or denturist with establishing the vertical dimension of occlusion. After this a bite registration is created to marry the position of one arch to the other. Once the relative position of each arch to the other is known, the wax rim can be used as a base to place the selected denture teeth in correct position. This arrangement of teeth is tried in to the mouth so that adjustments can be made to the Occlusion. After the occlusion has been verified by the doctor with the patient, and all phonetic requirements are met, the denture is processed. Processing a denture is usually performed in a lost-wax process whereby the form of the final denture, including the acrylic denture teeth, is invested in stone. This investment is then heated, and the wax is remove through a sprue when it melts. The remaining cavity is then either filled by forced injection or pouring of the uncured denture acrylic. After a curing period, the stone investment is removed, the acrylic is polished, and the denture is complete.
Storage : Keep Away from Direct Sunlight, Keep Away from Moisture, Always keep the Bottles and packets tightly closed once opened. Store at Temp. between 5°C to 30°C Shelf life not affected after opening if stored in a cool dry place, If not to be used for a longer duration, please keep them in refrigerator Allow material to reach room temperature prior to use
Disposal Conditions: To be disposed off based on the prevailing rules of the country in which it is used.
Warning:- Avoid prolonged or repeated contact with skin (allergic contact dermatitis), and eyes. Avoid prolonged inhalation. Do not take internally. Eye contact: if the product comes in contact with eyes it may cause irritation. In case of contact with eyes, rinse immediately with plenty of water and seek medical attention. Skin Contact: if comes in contact with Skin, it may cause skin sensitization, If contact with skin occurs immediately wipe off thoroughly with cotton and alcohol and then wash well with soap and water. If skin rash and sensitization or other allergic reaction occurs discontinue use and seek medical attention. It should not be used with patients who have a history of severe allergic reaction to any of the components
Presentation: Full set 28 no. of teeth / Set of Six(Anteriors)/ Set of Eight(Posteriors)
Ref No. PD30-01
Shelf Life: 4 years from date of manufacturing.

NOTE: TO BE USED BY DENTAL PROFESSIONAL ONLY

Manufactured By:
Golden Bird International
